Taylor Swift's Reputation Album - Text Analysis

Avery Shaw

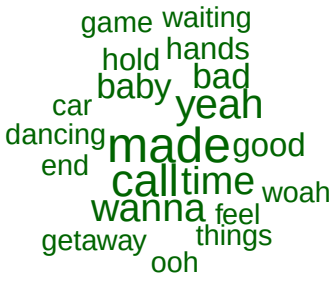

Introduction

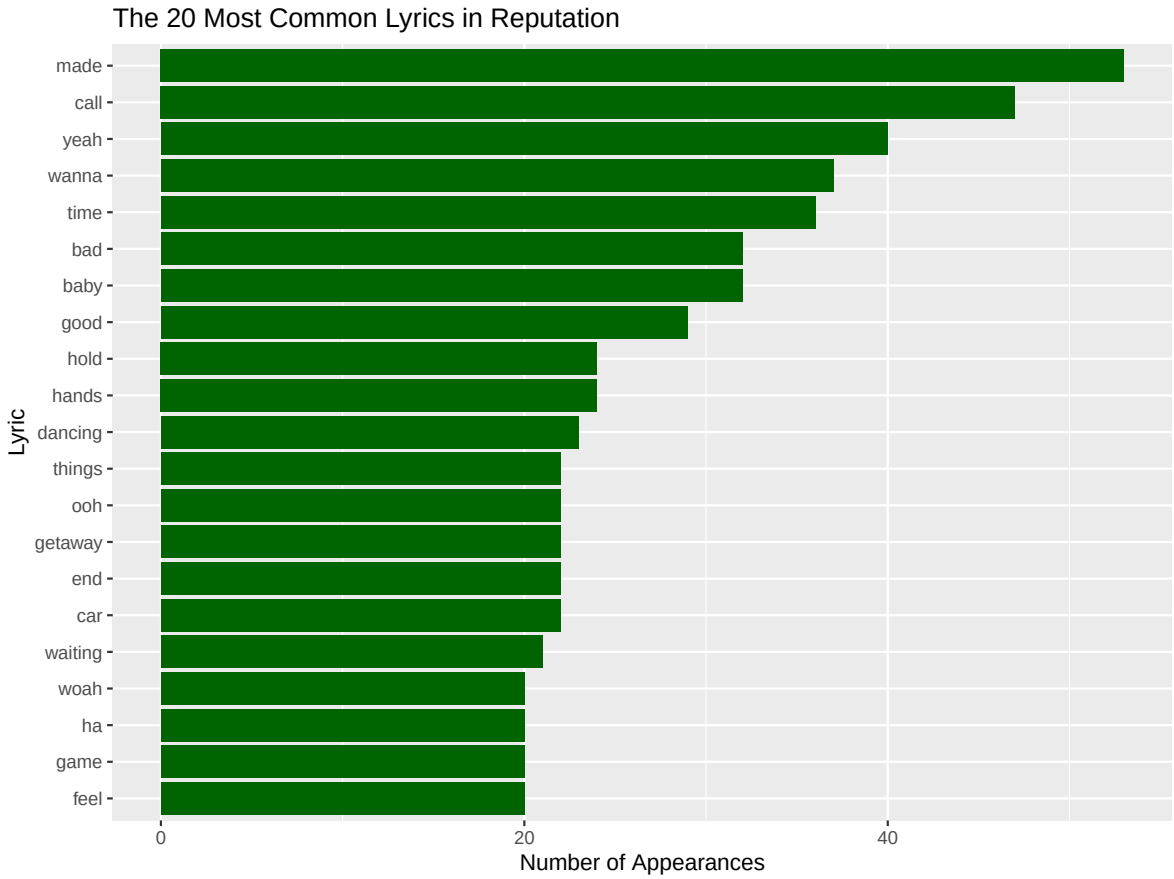

For this project, I am using the Corpus of Taylor Swift Lyrics, a dataset on GitHub containing lyrics from Taylor Swift's studio albums and selected non-album songs. The dataset organizes lyrics by album, track, lyric line, and song structure, allowing individual words to be analyzed within their larger context.

I chose to focus on lyrics from Swift's *Reputation* album, specifically because of the various emotional undertones in these collection of songs. Songs like *Look What You Made Me Do* and *I Did Something Bad* have more of vengeful and spiteful undertone, but at the same time there are songs like *Gorgeous* and *King of My Heart* which have loving undertones. To better understand the themes of this album, I will use text analysis to investigate how language varies across different types of songs, how sentiments vary over the course of the album, and which song is the most lyrically complex.

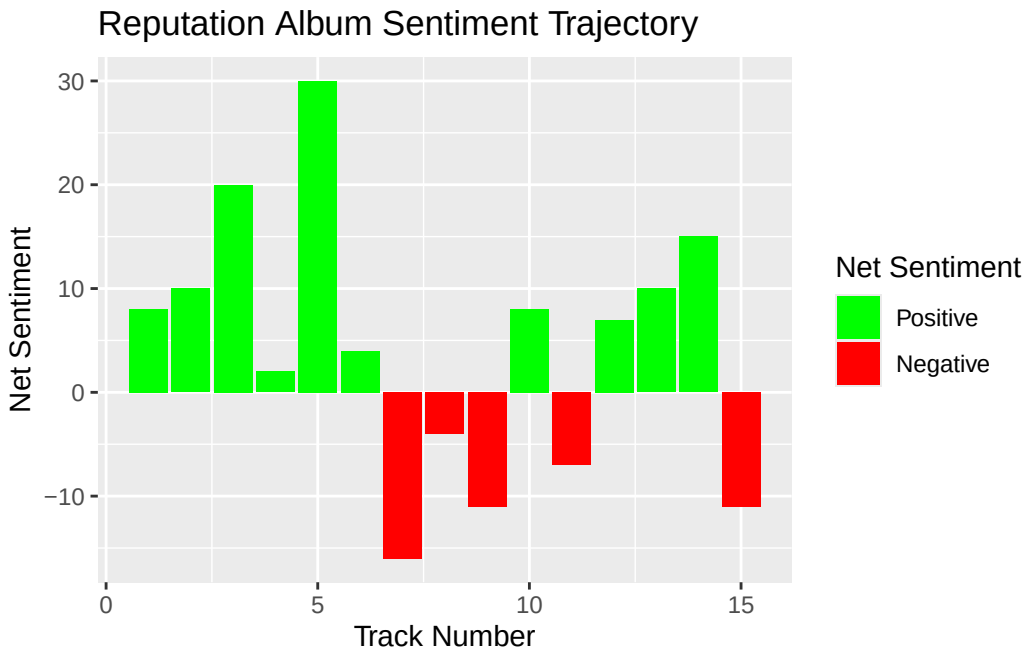

Most Apparent Non-Stop Words in Reputation

> Out of curiousity, I wanted to see what the most common words were, besides stop words, within the album.

Songs ranked by Sentiment group - Why is *Don't Blame Me* highest for positive AND negative sentiment categories?

Which Song in Reputation is the Most Lyrically Complex?

In looking at lyric complexity, I am taking into account the amount of unique words in a song out of all the total words. Songs with a higher proportion of unique words will have higher vocabulary diversity, and therefore less repetition of words.

```
# A tibble: 15 x 5
# Groups:   track_number [15]
   track_number title                    total_words unique_words repetition_rate
          <dbl> <chr>                          <int>        <int>           <dbl>
 1           13 This Is Why We Can't H~          415          140           0.663
 2            8 Gorgeous                         437          129           0.705
 3            9 Getaway Car                      546          159           0.709
 4            1 ...Ready for It?                 453          131           0.711
 5            2 End Game                         702          202           0.712
 6           14 Call It What You Want            520          149           0.713
 7           11 Dancing with Our Hands~          438          115           0.737
 8            7 So It Goes...                    389          102           0.738
 9           12 Dress                            491          128           0.739
10           10 King of My Heart                 468          122           0.739
11           15 New Year's Day                   366           94           0.743
12            3 I Did Something Bad              463          118           0.745
```

```
13           4 Don't Blame Me                482          116          0.759
14           5 Delicate                      487          115          0.764
15           6 Look What You Made Me ~       572          112          0.804
```

It looks like Track 13, *This Is Why We Can't Have Nice Things*, is the most lyrically complex out of all the songs with the highest proportion of unique vocabulary and, therefore, lowest word repetition rate of 0.663.

We can also see that Track 6, *Look What You Made Me Do*, is the least lyrically complex out of all the songs, with the lowest proportion of unique vocabulary and, therefore, highest word repetition rate of 0.804.
